

Government and Utilities Support

Did you know:

- The federal government, the State of California, and our local utilities all offer financial incentives, including tax credit and rebates, to EV car buyers to help reduce the up-front costs of plug-in electric vehicles

Federal and State Incentives

The US government currently offers a tax credit of \$2,500 to \$7,500 per new EV purchased for use in the U.S., depending on the size of vehicle and its battery capacity. The [US Department of Energy](#) has details on which qualify, and how to claim.

For California residents, [DriveClean California](#) maintains a database of rebates, discounts and tax breaks searchable by Zip Code.

Clean Fuel Rewards Program

Drivers of new or used electric vehicles served by SoCal Edison may be eligible to receive a [\\$450 Clean Fuel Rebate](#) for contributing to a cleaner energy future. The Clean Fuel Rebate is funded by the State of

California's Low Carbon Fuel Standard Program, which helps combat climate change by encouraging the use of clean fuels, like electricity, in vehicles.
