

City of El Segundo

(completed January 2014)

#MR312.22 - Maple Ave from Sepulveda Blvd to Parkview Pl -

This project improved signage and the widened the roadway on Maple Ave to provide a connection between north bound Sepulveda Bl. and the east bound I-105 ramps. This project provides an alternate route to and from the I-105 freeway, which relieves congestion on Sepulveda Blvd. Other improvements include: storm water ponding by installing catch basins and connecting them to the storm drain system, turn movements and traffic circulation, and traffic channelization (installation of calming features.)
