

South Bay Cities Council of Governments

Energy Engineering Technical and Professional Services

October 7, 2016

1. **Would the SBCCOG be open to small engineering firms partnering together on the proposal? For instance, having one prime and one or two subs.**

Yes, provided that there is one main contact for the SBCCOG to work with that represents all the partnering firms. The SBCCOG also reserves the right to request a sub to be removed from the project.

2. **Could you please clarify the following statement – “disclose any and all affiliations with any investor-owned utility (IOU)”? Is this referring to other contracts that firms may have with any of the CA IOUs?**

Yes, this statement is referring to other contracts that firms may have with any of the CA IOUs.

3. **On page 4, item f references meeting the SBCCOG’s goals set by Southern California Edison and Southern California Gas Company. Have these goals already been established? If so, what are they?**

Goals have not been established beyond 2016. Southern California Edison and Southern California Gas Company set goals annually based on the calendar year. Past goals for SBCCOG have been as follows:

Year	Reach Goals		SBCCOG Estimated Achievements	
	SCE (kWh)	SoCalGas(therms)	SCE (kWh)	SoCalGas(therms)
2013	3,421,258*	10,000	19,399	15,371
2014		10,000	779,367	16,852
2015	1,590,000	10,000	412,153	14,114
2016	1,511,338	10,000	520,757**	14,367**

*goal for 2013/2014

**as of Oct 2016

4. **On page 6, item b, states that the consultant will provide technical assistance to monitor and report short-term and long-term end-use energy and environmental conditions. Can you elaborate on the extent of monitoring specified here?**

Upon direction of the SBCCOG, monitoring and reporting on short-term and long-term end-use energy and environmental conditions will be needed during assessment of facilities and periodically to help reduce energy usage. It is not the intent of the SBCCOG to monitor all facilities daily or monthly.
