

## SoCalREN Kits for Kids Program

Providing children and their families with free energy-efficient items and education

The **SoCalREN Kits for Kids Program** introduces fourth-grade students from participating schools to energy efficiency. Students perform an interactive scavenger hunt and receive energy-efficient items at no cost that can help their families save money and improve their comfort and safety at home. Participation includes each household installing the energy-efficient items from the kit in their home. Each enrolled classroom is eligible to receive a \$1,000 grant, if 65% of students install the energy-efficient items and provide proof of installation.

### How It Works

1. School district enrolls in SoCalREN's Public Agency Program. Details at [socalren.org/agencies](https://socalren.org/agencies).
2. Schools and teachers receive information about Kits for Kids, and teachers enroll their classroom at [socalren.org/kitsforkids](https://socalren.org/kitsforkids).
3. Students take home kits with energy-efficient items, installation instructions, and educational activities.
4. Students complete at-home activities with their parents or guardians.
5. Families install the LEDs and other items in their homes, complete the installation verification card, and enjoy energy savings.
6. Students return the installation verification cards to their teachers, who then complete an online form verifying installation for their classroom.
7. Classrooms receive a \$1,000 grant after teachers report installation.

### Eligibility

- Schools must be within SoCalREN territory.
- Students must be in fourth grade.
- Households where energy-efficient items are installed must be in SoCalREN service area. See service areas at [socalren.org/about](https://socalren.org/about).

### What's in the Kits

- Two LED bulbs
- One efficient-flow showerhead\*
- Two faucet aerators\*
  - One 1.5 GPM kitchen faucet aerator
  - One 1.0 GPM bath faucet aerator

### Benefits

- Students, teachers, and families learn about the importance of energy efficiency.
- Families receive energy-efficient items at no cost, plus enjoy long-term savings on their energy costs.
- Classrooms that meet participation goals, receive grant support.
- Residential communities reduce their contribution to climate change.
