

Roxanne Fung is the Corporate Controller at Relativity Space, a company founded in 2015 with a mission to build humanity's multiplanetary future and is currently valued at \$4.2 billion.

Starting with the world's first entirely 3D-printed rocket, Relativity is redefining the future with intelligent robotics and proprietary software, creating an entirely new tech stack in aerospace. As a vertically integrated technology platform, Relativity is at the forefront of an inevitable shift toward software-defined manufacturing. The company is looking forward to its first rocket launch from Cape Canaveral Florida later this year. Roxanne is responsible for Relativity's Accounting, Tax Compliance, and Payroll functions and helped scale the company from 30 to 700+ employees.

Prior to Relativity Space, Roxanne has served in the Corporate Controller capacity at private equity backed and multinational firms in telecommunications/media and other manufacturing sectors. She has extensive experience in M&A, turnaround management, process optimization, system implementations, and global operations management.

Roxanne was born and raised in Hong Kong and earned her B.A. degree in Business Economics with an Emphasis in Accounting from University of California Santa Barbara. She currently resides in Los Angeles with her husband.
