

Bio for Will Bruey

Will started his career at SpaceX where he was a hardware engineer working on the Falcon rocket and Dragon spacecraft, before flying 8 flights to the ISS from mission control as the lead of the dragon spacecraft. He subsequently spent time at Bank of America Merrill Lynch as a Director of Global Equities Technology before founding Varda Space Industries in November of 2020 where he serves as CEO. Will holds a BS in Applied Physics from Cornell, and Masters of Systems Engineering from Cornell. In his free time, he maintains and flies his Cozy Mark 4 experimental aircraft.
